

ISO 05 sandwich manifold retainer and Viton seal kit

Functional Group:

Products : Accessories : Retainers and Seals for Sandwich Manifolds : ISO 05 : Seal and Retainer Kit (Viton)

Model:

990-111-003

Product Description

Sun ISO 05 sandwich bodies are available for many mounting configurations and are offered in two styles. The style is determined by the method used to seal the fluid interfaces. A seal retainer plate is used on all ISO 05 sandwich bodies where it is functionally feasible to rotate the body in relation to the seal retainer plate, providing two different mounting positions. For those ISO 05 sandwich bodies where it is not functionally feasible to rotate, counterbores are included on the body sealing faces and no seal retainer plate is required. Seal retainer plate only, seals only, and combination kits are available.

SEAL RETAINER PLATE

SEALS

Technical Features

- | All Sun seal plates are manufactured to current industry standards regarding port and mounting bolt locations.
- | Seal retainer plates are included with and used on all ISO 05 sandwich bodies where rotation is functionally feasible.
- | The ISO 05 sandwich body can only be rotated about a single axis. Depending on the rotation of the body in relation to the seal retainer plate, the "A" and "B" port connections can be reversed but the "P" and "T" port connections will remain unchanged.

Technical Data

	U.S. Units	Metric Units
Model Weight	0.08 lb.	0.04 kg.
Plate Thickness	.050 in.	1,27 mm
Seal Material	Viton	
Valve Pattern Interface	ISO 05, NFPA D05, CETOP 5
