

T (momentary/twist operation) control kit

Functional Group:

Products : Accessories : Cartridge Control Options and Kits : Twist and Lock Manual Override

Model:

991-225

Product Description

The Twist/Lock manual override is a rotary, hand-actuated device for use on Sun's full flow solenoid valves. The hand knob is constructed of a reinforced plastic for durability, heat resistance and stability in varying environmental conditions and is suitable for operation with a gloved hand. The override assembly incorporates a sealed-construction design thereby preventing the introduction of debris and other damaging contamination. Once installed on a Sun solenoid valve, the override feature allows the operator to manually shift the de-energized valve. Solenoid cartridges may be ordered in this configuration by specifying a T, L, or D control in the cartridge model number. Sun kits for field conversion are also available.
