

## Free flow nose to side check valve

Capacity:  
40 gpm (160 L/min.)

Functional Group:  
Products : Cartridges : Check : 2 Port : Free Flow Nose to Side

Model:  
CXFA-XBN

### Product Description

Free-flow, nose-to-side check valves are on/off circuit components that allow free flow from the inlet (port 1) to the outlet (port 2) and block flow in the opposite direction.

### Technical Features

- Two-port check valves share the same cavity for a given frame size, however, pay close attention as flow paths may be in opposite directions.
- Will accept 5000 psi (350 bar) at ports 1 and 2.
- Check valves offer extremely low leakage rates with a maximum leakage of less than 1 drop per minute.
- Stainless steel cartridge options P or W are intended for use within corrosive environments with all external components manufactured in stainless steel or titanium. Internal working components remain the same as the standard valves.
- Incorporates the Sun floating style construction to minimize the possibility of internal parts binding due to excessive installation torque and/or cavity/cartridge machining variations.
