

# Fully adjustable pressure compensated flow control valve with reverse flow check

Capacity: 25 gpm (95 L/min.)

FDEA-HAN

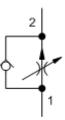

Model:

Functional Group:

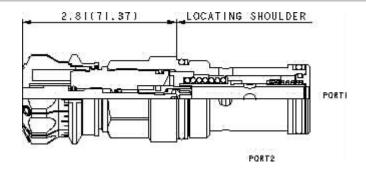

Products : Cartridges : Flow Control : 2 Port : Fully Adjustable, Pressure Compensated, with Reverse Flow Check

### Product Description

Fully adjustable, pressure-compensated flow controls with reverse-flow check provide precise flow regulation for meter-in or meter-out applications where there may be wide pressure fluctuations. They are infinitely adjustable from nearly closed up to the maximum flow. An integral high-capacity check valve provides unrestricted flow from port 2 to port 1.

#### **Technical Features**

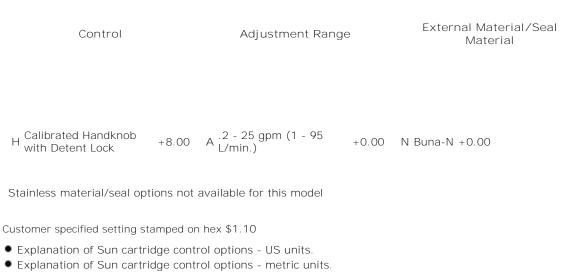

- All 2-port flow control cartridges are physically and
  Accurate pressure compensated control requires functionally interchangeable (i.e. same flow path, same cavity for a given frame size). However, cartridge extension dimensions from the mounting surface may vary.
- A balanced adjustment mechanism allows for easy adjustment even at high pressures.
- that a 200 psi (14 bar) minimum pressure differential be maintained across the valve.
- The sharp-edged orifice design minimizes flow variations due to viscosity changes.

	U.S. Units	Metric Units
Cavity	T-16A	
Capacity	25 gpm	95 L/min.
Adjustment - Number of Counterclockwise Turns - Fully Closed to Fully Open	5	
Maximum Operating Pressure	5000 psi	350 bar
Series (from Cavity)	Series 3	
U.S. Patent #	4,630,640	
Valve Hex Size	1 1/4 in.	31,8 mm
Valve Installation Torque	150 - 160 lbf ft	200 - 215 Nm
Adjustment Screw Hex Socket Size	5/32 in.	4 mm
Adjustment Nut Hex Size	9/16 in.	15 mm
Adjustment Nut Torque	108 lbf in.	12 Nm
Model Weight	1.25 lb	0,60 kg
